Application for Project Management Internship

Intern (m/f/d) Project Management | Reference R-01031458

Dear Fresenius Kabi Hiring Team,

I am applying for the Project Management internship in your Global Information and Digital Technology department. I am pursuing an M.A. in International Management with a Project Management focus at Hochschule Fresenius in Cologne. Your work on process harmonisation and the adoption of digital tools fits my experience in project coordination and my current academic-industry work on AI-enabled workflows.

At Petro Sanat Lidoma, I coordinated procurement and delivery activities across eight national-scale EPC and industrial projects, working with more than 30 suppliers in Europe and Asia. I prepared management reports, tracked milestones and open actions, and followed up across technical and commercial teams. Improving digital documentation and reporting contributed to an approximately 50% improvement in procurement efficiency and reporting transparency. These responsibilities provide a practical foundation for supporting your global IT project managers.

In my current collaboration with Hochschule Fresenius and KUKUK Ingenieure, I support the evaluation of AI-enabled workflows through validation, documentation, deliverable tracking and stakeholder communication. I also teach Strategic Sourcing and have delivered Excel training to engineering students. This experience is relevant to preparing training materials and explaining new processes clearly. I bring advanced Excel skills and experience with PowerPoint and MS Project, and I am keen to develop hands-on skills in Power BI, Microsoft Copilot and formal change management methods.

I communicate confidently in English at C1 level; my German is A2 and improving. I am interested in completing this internship as part of my studies and am willing to attend regularly in Bad Homburg. I would welcome a discussion about the six-month placement, the start date and how I can contribute to your team. The links below provide a short application overview and my full professional background.

Thank you for considering my application.

Sincerely,
Ali Soleimani
